Skills

Front-end development: React, Astro, Next.js, React Native, Tailwind CSS, Storybook, Jest, JS, CSS, HTML
Back-end development: NestJS, Express, Hono, TypeScript, Node.js, Deno, REST API, SQL, NoSQL (MongoDB)
Software engineering: Python, Rust, AI (ML, LLM), OpenAPI, Docker, Terraform, AWS, CI/CD, OOP, TDD, UML
Collaboration and other: Jira, Git, Figma, UI/UX, SEO, Agile (Scrum, Kanban), Slack, English, Polish

Experience

Software Engineer Intern – Atlassian Jul 2023 – Sep 2023

- Worked as a front-end intern, contributing to the Jira platform that is used by 300 000+ teams worldwide.
- Implemented new and maintained existing modular components using React, TypeScript, and CSS-in-JS.
- Delivered features using CI/CD, feature flags, and established rollout procedures, ensuring safe deployments.
- Improved monitoring solutions with Splunk and Terraform, reducing time spent on manual dashboard tracking.
- Collaborated with developers, UI/UX designers, and content designers to align design and implementation.
- Participated in peer code review as a reviewer and a reviewee, improving overall system code quality.
- Took part in various Scrum ceremonies, as well as cross-team syncs to support Agile feature delivery.
- Wrote unit tests, technical documentation, and Confluence design decision documents to aid maintainability.

Freelance Web Developer Aug 2022 – Jan 2023

- Designed, developed, and deployed professional websites that attract 1000+ unique visitors monthly.
- Improved SEO, performance, responsiveness, and accessibility to ensure good UX and attract new clients.
- Monitored stability and performance using web analytics (Vercel, Cloudflare) to ensure long-term efficiency.

Education

MSc in Applied Computer Science – Wrocław University of Science and Technology Feb 2024 – Jul 2025

- Applied machine learning to optimize various code review and testing processes. Grade: 5.5 (excellent)
- Wrote a thesis on test case prioritization, contemplating its theoretical and practical use.
- Architected search engines (Meilisearch), big data flows (Oracle), and web apps (Angular).
- Prepared two AI-related articles submitted for publication in scientific journals.

BSc in Applied Computer Science – Wrocław University of Science and Technology Oct 2020 – Jan 2024

- Built mobile and web applications with ASP.NET (C#), FastAPI (Python), and React. Grade: 5.5 (excellent)
- Designed, optimized, and deployed SQL and NoSQL (MongoDB, Neo4j, Redis) database systems.
- Used Python machine learning libraries, like scikit-learn, to solve classification and regression tasks.
- Took part in group (2-7 member) projects using collaboration tools like Jira, Confluence, Git, and GitHub.

Web Development Bootcamp Certificate – CodersCamp by CodersCrew & LiveChat Oct 2021 – May 2022

- Worked remotely in a 5-person Scrum team, designing and building 4 full-stack web apps end-to-end.
- Wrote front-end (Next.js, React) and back-end (NestJS) TypeScript code; provided tests and documentation.
- Earned certifications with honors after passing proficiency exams in Node.js, React, and TypeScript.

Projects

Adwokat Wałbrzych: a website for a local law firm, visited by 900+ users monthly. kancelariawalbrzych.pl
tchojnacki.dev: a personal portfolio and blog website, with 100+ monthly visitors. tchojnacki.dev
Senso Mobile: a React Native app for elder care; my engineering thesis project. zpi-2023/senso-frontend
